

A detailed technical drawing of a typical plan view of an ICT chamber. The chamber is rectangular with a central area labeled "DATA". The walls are thick and have a stippled texture. The floor and ceiling are indicated by diagonal hatching. On the left and right sides, there are rows of circular openings, likely for ventilation or cable entry. A callout line points to these openings with the text "CABLE SLEEVES (NUMBER & SIZE AS SPECIFIED)". Dimensions are provided: the total width is 3000, with 100 on each side and 230 in the center. The total height is 1500, with 100 at the top and bottom, and 230 on each side. A section line "A-A" is shown at the bottom left. The caption "TYPICAL PLAN VIEW OF ICT CHAMBER" is at the bottom.

1. COVER TO BE SET CENTRAL TO BRICKWORK
2. TOP SURFACE OF COPING TO BE FINISHED SMOOTH AND TO SUIT LEVEL OF SURROUNDING PAVING
3. NUMBER OF BRICK COURSES TO SUIT DEPTH OF SLEEVES
4. BRICK CONSTRUCTION
5. JUNCTION BOX TO BE PLASTERED INSIDE
6. MANHOLE COVER TO BE POSITIONED TO LINE UP WITH EXTERNAL FINISHES
7. CONCRETE MIX:

**General Notes:**

- All dimensions and levels are to be checked on site by the Contractor and discrepancies must be reported to the Architect at any such time.
- This drawing is to be read in conjunction with all other drawings including those of Specification and all title blocknotes and/or amendments issued for this project.
- Sealed dimensions are not to be used for construction. Should there be any discrepancies or lack of dimensions the Architect's dimensions shall prevail.
- Only dimensions numbered 200 and 400 upwards and showing the latest revision are to be used for construction. All previously issued drawings are to be destroyed.
- This drawing is only to be used for the project and site for which it was prepared.
- No setting out to commence before the position of the building on the site has been verified by a Land Surveyor.
- Sewer connection to comply with municipal regulations.
- The Architects reserve the copyright in this drawing.
